LGIP – Local Government Investment Pool has earned \$207,446.23 in interest on funds invested in LGIP year to date. The City is currently earning 3.71% on all invested funds, which is slightly higher than the 3.64% Federal Funds effective rate. The LGIP’s interest rate is typically very close to the Federal Funds effective rate and therefore will ebb and flow in the same manner.

The federal funds rate is the central interest rate in the U.S. financial market. It influences other interest rates such as the prime rate, which is the rate banks charge their customers with higher credit ratings. Additionally, the federal funds rate indirectly influences longer- term interest rates such as mortgages, loans, and savings, all of which are very important to consumer wealth and confidence.
